

6th Edition

Practical Diabetes Mellitus

Pradeep G Talwalkar

1. Introduction	1
2. Classification and Clinical Manifestations	4
Maturity Onset Diabetes of Young 10; Other Specific Types of Diabetes 11; A Note on Older Classification of Diabetes 12; Peculiarities of Diabetics in India 13	
3. Type 2 Diabetes in Children and Adolescents	15
Clinical Features 16; Management of Type 2 Diabetes in Children 17	
4. Epidemiology of Diabetes	18
Epidemiology of Type 1 Diabetes Mellitus 19; Epidemiology of Type 2 Diabetes Mellitus 20; Epidemiology of Gestational Diabetes Mellitus 23	
5. Diabesity	25
Central Obesity 29; How do We become Fat? 30; Disorders Associated with Obesity 31; Management of Diabesity 32; Look Ahead Study 38	
6. Metabolic Syndrome	39
Prevalence of Metabolic Syndrome 39; The Importance of Metabolic Syndrome 40; Management of Metabolic Syndrome 41; The Controversy on Metabolic Syndrome 42	
7. Diagnosis and Laboratory Investigations	43
Criteria for Diagnosis of Diabetes 44; Recommendations and Conclusions of International Committee 53	
8. Use of Glucometer in Family Practice	57
Equipment Required for Home Blood Glucose Monitoring 58; Reliability of Glucometer 59; Training the Patients using Glucometers 60	

- 9. Metabolic Memory (Legacy Effect) 64**
Pathogenesis of Metabolism Memory 67;
Therapeutic Implications and Future Prospects 68
- 10. Management of Diabetes 72**
Why Control Diabetes? 72; Difference between Onset
and Progression of Microvascular and Macrovascular
Complications 74; Take Home Message 75;
Management of Diabetes 77
- 11. Role of Exercise in the Management of
Diabetes Mellitus 78**
Benefits of Exercise 78
- 12. Meal Planning in Diabetes 84**
What is a Balanced Food? 85; The Food Exchange 90;
General Guideline 93; Some Tools used in Meal Planning 94
- 13. Oral Antidiabetic Agents and Injectable
Incretin Mimetics 100**
History of Development of OADs 100;
Pharmacology 101; Sulfonylureas and Other Insulin
Secretagogues 102; Progressive β -cell Failure in Type 2
Diabetes 104; Biguanides 109; Thiazolidinedione (also known
as glitazones) 113; Alpha-glucosidase Inhibitors 116; Incretin
Mimetics and Incretin Enhancers 117; Criteria for Control 122;
Failure of Control 123; Side Effects 123
- 14. The Roller-Coaster Ride of Rosiglitazone—
Rise, Fall and Rebirth 127**
What is Meta-analysis? 127; The Flow of Events so Far 127
- 15. The Great Indian Pioglitazone Fiasco—
Such Things Happen Only in India 134**
Background 134; Pioglitazone Sale Suspended in
India 135; Suspension Revoked 136

- 16. Role of Insulin** **140**
Insulin Physiology and Pathophysiology in Diabetes *141*;
Bovine and Porcine Insulin: Historical Aspects *159*
- 17. Combination Therapy in Diabetes** **163**
Combinations of Oral Antidiabetic Medications *163*;
Combinations of Insulin with Oral Antidiabetic
Drugs *169*; Exenatide/Liraglutide Combinations with
Insulin/Metformin/Pioglitazone/Sulphonylurea *171*
- 18. Management of Diabetes in Elderly** **172**
Prevention of Diabetes in the Elderly *173*;
Management of Diabetes *173*
- 19. Prescribing Antidiabetic Medications
in Renal Impairment** **179**
Metformin *180*; Sulphonylurea Compounds *180*;
Non-sulphonylurea Insulin Secretagogues *181*;
Pioglitazone *181*
- 20. Acute Metabolic Complications of Diabetes** **184**
Acute Metabolic Complications *184*
- 21. Chronic Complications of Diabetes** **198**
Microvascular Complications *198*; Macrovascular
Complications of Diabetes *201*; Infections in
Diabetes *202*; Musculoskeletal and Rheumatologic
Complications of Diabetes *203*
- 22. The Diabetic Foot** **208**
- 23. Hypertension in Diabetes** **212**
Epidemiology *213*; Types of Hypertension in Diabetes
Mellitus *214*; Management of Hypertension in Diabetics *215*

- 24. Management of Hyperlipidemia in Diabetes Mellitus** 222
Investigations 224; Management of Hyperlipidemia 224; Hypertriglyceridemia 226
- 25. Surgery in a Diabetic Patient** 230
Metabolic Effects of Surgery and Anesthesia 231; Anesthetic Agents and Anesthesia 231; Preoperative Evaluation 232; Insulin Therapy 232; On the Day of Surgery 233; Alternative Insulin Regimens 234; Minor Surgical Procedures 235; Postoperative Care 236; Special Situations 236
- 26. Some of the Advances in the Management of Diabetes** 238
Continuous Glucose Monitoring Systems 238; Insulin Delivery 240; Other Directions in Insulin Research 244; Routes of Administration of Insulin 245; Self-regulating Delivery Systems 247; Insulin Gene Therapy 247; Advances in the Treatment of Complications 248; Diabetes in the Twenty-first Century 256
- 27. Prevention of Diabetes** 257
Important Diabetes Primary Prevention Studies 258; Other Measures to Prevent Type 2 Diabetes 261; Prevention of Type 1 Diabetes 262
- 28. Appendix** 263
A. Foot Care in Diabetes 263; B. Mixing Insulins 264; C. Correct Technique Injection (For Self-injection) 267; D. Stepwise Procedure for using Reusable Insulin Pen 268; E. Tips for Painless Insulin Injection 272; F. What are the Best Parts of the Body for Injection? 272
